

## Excursion C on 28<sup>th</sup> September 2017 Mine Water Treatment Plants Schlema/Alberoda and Pöhla and Mine “Zinnkammern Pöhla”

For 25 years the WISMUT company has been responsible for the remediation of former uranium mining sites in Saxony and Thuringia in Eastern Germany. The company focusses on monitoring, remediation and water management in these former mining sites. During the excursion you will visit two mine water remediation plants operated by the WISMUT company. The tour will continue to the visitor tin mine in Pöhla ‘Zinnkammern Pöhla e.V.’ There you will participate in a geological tour through the mine and enjoy a dinner for miners (‘Bergbrot’) before returning to Freiberg.

### Time schedule

**Meeting point: Untermarkt Freiberg at 7.30**

- **7.45:** Departure from Freiberg by bus
