

Excursion C on 28th September 2017

Mine Water Treatment Plants Schlema/Alberoda and Pöhla and Mine "Zinnkammern Pöhla e. V."

For 25 years the WISMUT company has been responsible for the remediation of former uranium mining sites in Saxony and Thuringia in Eastern Germany. The company focusses on monitoring, remediation and water management in these former mining sites. During the excursion you will visit two mine water remediation plants operated by the WISMUT company. The tour will continue to the visitor tin mine in Pöhla 'Zinnkammern Pöhla e.V.' There you will participate in a guided tour through the mine and enjoy a dinner for miners ('Bergbrot') before returning to Freiberg.

Planned schedule

- 7.30:** Departure from Freiberg by bus (meeting point will be announced)
- 9:30-10.15:** Schacht 371 in Hartenstein with introductory lecture by Dr. Michael Paul (Wismut GmbH): information on mine water remediation projects by Wismut GmbH
- 10.30-12.00:** Visit of the water treatment plant in Schlema-Alberoda for the removal of uranium, radium, arsenic, manganese, and iron
- 12.00-13.30:** Lunch at restaurant "Zum Füllort" in Bad Schlema, Kulturhaus Aktivist (not included)
- 13.30-14.15:** Drive to Pöhla
- 14.15.-15.15:** Visit the water treatment plant in Pöhla for removal of arsenic and radium
